

Health Update: **SARS**

January 15, 2004

This document will be updated as new information becomes available. The current version can always be viewed at <http://www.dhss.state.mo.us/>.

The Missouri Department of Health & Senior Services (DHSS) is now using 4 types of documents to provide important information to medical and public health professionals, and to other interested persons:

Health Alerts convey information of the highest level of importance which warrants immediate action or attention from Missouri health providers, emergency responders, public health agencies, and/or the public.

Health Advisories provide important information for a specific incident or situation, including that impacting neighboring states; may not require immediate action.

Health Guidances contain comprehensive information pertaining to a particular disease or condition, and include recommendations, guidelines, etc. endorsed by DHSS.

Health Updates provide new or updated information on an incident or situation; can also provide information to update a previously sent Health Alert, Health Advisory, or Health Guidance; unlikely to require immediate action.

Health Update
January 15, 2004

FROM: RICHARD C. DUNN
DIRECTOR
SUBJECT: **Severe Acute Respiratory Syndrome (SARS)**

[This **Health Update** on **SARS** contains information on 1) a **January 15, 2004, Health Advisory** which provides new information and recommendations following reports of a third possible **SARS** case in China, 2) a **January 13, 2004, Health Advisory** which contains updated information on the clinical evaluation and management of patients who present from the community with fever and/or respiratory illnesses, and 3) a **January 12, 2004, Health Guidance** which provides updated recommendations for community-level **SARS** preparedness and response.

The department has recently released two **Health Advisory** documents, and one **Health Guidance** document, on severe acute respiratory syndrome (SARS):

1. **January 15, 2004, Health Advisory: Updated SARS Information and Recommendations Following Reports of a Third Possible SARS Case in China**
This **Health Advisory** contains updated information and recommendations from the Centers for Disease Control and Prevention (CDC) following recent reports of cases of SARS in Guangdong Province, China.
2. **January 13, 2004, Health Advisory: Clinical Guidance on the Identification and Evaluation of Possible SARS-CoV Disease among Persons Presenting with Community-Acquired Illness**
CDC has recently issued updated guidance on the clinical evaluation and management of patients who present from the community with fever and/or respiratory illnesses. This **Health Advisory** (which replaces a previous SARS Health Advisory released on December 22, 2003) summarizes the key points of the updated CDC guidance document.
3. **January 12, 2004, Health Guidance: Public Health Guidance for Community-Level Preparedness and Response to Severe Acute Respiratory Syndrome (SARS)**
CDC has also recently updated a comprehensive SARS guidance document developed to assist local and state public health and healthcare officials in their preparations for SARS. This **Health Guidance** (which replaces a previous SARS Health Guidance issued November 7, 2003) reproduces the updated CDC document. It is strongly recommended that all Missouri healthcare facilities and public health agencies carefully review and utilize this material as they develop and update their own SARS preparedness and response plans. The complete (241-page) **Health Guidance** document, as well as individual sections of the document, are available at http://www.dhss.state.mo.us/SARS/SARS_Guidance.htm.

The most recent SARS-related Health Alerts, Health Advisories, Health Guidances, and Health Updates, as well as other sources of information on SARS, are available on the Missouri Department of Health & Senior Services (DHSS) SARS website (go to <http://www.dhss.state.mo.us/> and click on "SARS"). Specific questions on SARS should be addressed to DHSS's disease investigation unit at 573/751-6268, or after-hours at 1-800-392-0272.
